

1、网页向上滚动过渡脚本

Html 首页底部添加 js

```
<script type="text/javascript">
    $(".s-top").click(function(){ $("html,body").animate({scrollTop:0},500);});
    //点击区域外跳转
    $(".product-pic-box").click(function(e){
        var _target = $(e.target);
        if (_target.closest("a").length == 0) {
            window.location.href = "product_bathtub.html";
        }
    })
</script>
```
